

# RING STAR

## Accessories & Ordering Info

### Ring Star lubrication gun

Description	Part number
Manual, compressed air operated lubrication gun for safe application of lubricant in rotary kilns	J2E5A7

### Ring Star automatic application unit

Description	Part number
Automatic lubricant application unit operated with compressed air	J9M3A5

### Compressed air filter regulator

Description	Part number
0,3-7 bar, 40 µm with coupling G 1/4" connection	T9F5A6

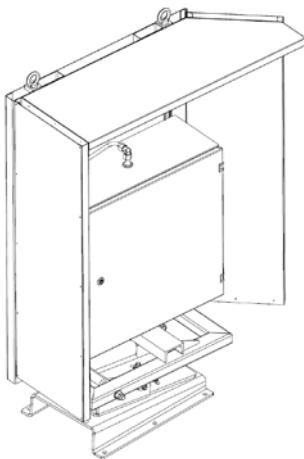

## Filling pump for 60L/200L drums

Flow rate	Tank	Hose length	Part number
Adjustable 0,10 - 0,15 - 0,20 - 0,25 dm <sup>3</sup> /Hub	Applicable for 60 and 200L drum	1,5m	X9U4A2

## Filling pump with tank

Flow rate	Tank	Hose length	Part number
0,12 dm <sup>3</sup> /Hub	16 dm <sup>3</sup>	1,5m	U9U4A5

## Swivel device and heat protection

System for fine adjustment of the application process

Description	Part number
left version	V2T4A6
right version	C3T4A0

## Protective cabinet for Ring Star lubrication gun

Description	Part number
On-site protection cabinet for manual lubrication gun	L9L3A4

## Straight extension for Ring Star lubrication gun

Description	Part number
1m length, to extend the firing distance	Y8G5A3

## 45° extension for Ring Star lubrication gun

Description	Part number
1m length, to extend the firing distance	M1J5A3

## Monopod for Ring Star lubrication gun

Description	Part number
For easier handling	C1J5A2
